

FIBER OPTIC SPLICING UNIT

Now you can do your line maintenance and Fiber Optic splicing from one climate controlled vehicle. The bucket provides the means to bring the cable down. The body is equipped with a table for splicing cable quickly and efficiently with all your equipment conveniently at your finger-tips. When finished, the cable can be replaced and you've done the job with one vehicle.

FEATURES AVAILABLE:

- Heating/Air Conditioning Units
- 5500 Watt Engine/Generator or more
- Windows for Natural Lighting
- Fluorescent lights
- Splicing Table
- 125 Volt Receptacle with GFI Inside Body
- Consult Factory for Other Options

You have your choice of steel or fiberglass bodies. Both offer a carefully planned, standard compartment setup that lets you store and find your tools quickly. Compartments can be tailored to your special needs.
